Free Flu Vaccines!

As the colder months approach, it's important to protect yourself against the flu. If you're aged 65 or over or in a clinical risk group, you're eligible for a free flu vaccine.

Here's why you should get vaccinated:

Protect Your Health: The flu can lead to serious complications, especially in older adults. The vaccine is your best defence.

Safe and Effective: The flu vaccine is safe and has been shown to reduce the risk of flu illness, hospitalisation, and even death.

Quick and Easy: Getting vaccinated is simple and takes just a few minutes.

Remember to book your free vaccine at your GP practice and protect yourself this winter!
